

Plot

I don't know what the fuck is going on. Aliens coming to earth and demanding human sacrifices? On top of that each country agreeing to offer up their brightest? Well, It may not be too bad- we have a good life here and everything. I'm not complaining. We've been living on the moon for a couple months now and we have got the whole 'stranded with no hope' thing down to a science. But then some girl got pregnant. She insists that she's a virgin. None of us buy it but none of the guys are fessing up. Those liars. I mean one of them has to be lying...right?
